Week 2

Capstone Project Description – Part 01

For this project, I am doing it for myself as an individual personal project. However, the website is being designed professionally and can be used for business. It is for someone who may already own a business with a website, but from their business, they may have a small passive income that may have been established in the thrifting market. So, I am intending on setting up a website for them so that they can reach a digital audience! So, I am designing it as an individual personal project and possibly establishing it when complete. Which I will then be able to document within my portfolio.
